1. No references were used to gather information for this assignment
2. N/A
3. N/A
4. I would say that the easiest part of the assignment was actually the coding itself. Once I was able to get into java it was relatively easy for me, which is most likely because this is such a basic assignment. I am sure that as the class goes on I will have more difficulty with other assignments. The most challenging thing for me was actually developing the pseudocode. It was the first time I have ever made a pseudocode, and I was not really sure how to do it. I did reference the information on canvas about it but I still am not too confident that I did everything correctly.
